## Lake Fact Sheet – Parry Sound District Lake Rosseau

### Location

Official Name:..... Lake Rosseau      Local Names:.....  
 County/District:..... Muskoka, Parry Sound      Geographic Twp:..... Cardwell, Watt, Medora, Humphrey  
 Municipality:..... Township of Muskoka Lakes      MNR Admin. Area:..... Bracebridge  
 ..... Township of Seguin  
 Lat./Long:..... 45.1739 N 79.5850 W      UTM (NAD83):..... 17 611186 5003242  
 Topographic Map (1:50,000):..... 31E04      Drainage Basin:..... Lake Rosseau

### Physical Features

Surface Area (ha):..... 6390      Maximum Depth (m):..... 89      Mean Depth (m):..... 24  
 Elevation (m asl):..... 225      Perimeter (km):..... 151      Island Shoreline (km):..... 80  
 Volume (10<sup>4</sup> m<sup>3</sup>):..... 153000      Watershed (km<sup>2</sup>):..... 204      Water Clarity (m):..... 5.4  
 (excludes area of lake)

### Land Use and Development

Crown Land (%):..... 0      Provincial Parks:..... none  
 Shoreline Development:..... intense; urban, commercial, shoreline residential  
 Access:..... public; public boats launches at Rosseau, Port Carling, Skeleton Bay;  
 ..... private access at numerous marinas;  
 ..... navigation lock from Lake Muskoka at Port Carling  
 ..... water access from Lake Joseph at Port Sandfield and Joseph River  
 Water Level Management:..... regulated; water level is controlled by an MNR owned and operated dam at Port Carling;  
 ..... flows and levels are regulated by the Muskoka River Water Management Plan

### Fish Species

Major Fish Species:..... lake trout, lake whitefish, cisco, walleye, smallmouth bass, largemouth bass,  
 ..... muskellunge (I), northern pike, burbot, black crappie (I 1987)  
 Other Fish Species:..... rainbow smelt (I), spottail shiner, pumpkinseed, brown bullhead, creek chub,  
 ..... rock bass (I 1987), ninespine stickleback, margined madtom (I?), white sucker, golden shiner,  
 ..... slimy sculpin, yellow perch, bluntnose minnow, Emerald Shiner, Logperch  
 Other Species:..... spiny water flea (I 1989)

Notes: E: extirpated, I: introduced – intentional or accidental, O: occasional, R: remnant, S: currently stocked, ?: status uncertain,  
 2009: year of first record or introduction if known, blank: presumed native

## Fisheries Management

<i>Fisheries Management Zone:</i> .....	15
<i>Designation for Lake Trout Management:</i> .....	designated; natural reproduction; not at development capacity
<i>Fishing Regulation Exceptions</i> .....	no lake-specific exceptions
<i>Current Stocking:</i> .....	none
<i>Historic Stocking (last year stocked):</i> .....	smallmouth bass (1950), rainbow trout (1975), walleye (1984), lake trout (1990)
<i>Contaminants (species tested):</i> .....	lake trout, lake whitefish, cisco, smallmouth bass, rock bass
<b>Assessment:</b>	<b>Completed Projects:</b>
	1977 lake survey
	1988-2003, 2005, 2006 winter creel survey
	2005-2009, annual ice hut count
	1992, 1999 summer creel survey
	1993-1996 Spring Littoral Index Netting (lake trout)
	1995-1996 small fish survey
	1996, 1998, 1999, 2001 Near Shore Community Index Netting
	1993-1995 bass spawning observations
	1990 vegetation mapping
	1993 substrate mapping
	1988-1989 critical habitat mapping
	1990-1992 water chemistry
	1991 lake trout spawning observations
	1989-1994 zoo plankton and benthic invertebrate sampling
	1989, 1993 contaminant sampling
	2002-2003 bathymetric mapping
	2002-2006 Summer Profundal Index Netting (SPIN) (lake trout)
	2007-2008 Broad-scale Monitoring (BsM) (small and large mesh gill netting)
	2009 SPIN
	2011 SPIN, BsM (large mesh nets)

## Synopsis

Lake Rosseau is a large, deep, clear oligotrophic lake. It is one of the largest and best lake trout lakes in Parry Sound District, possessing excellent lake trout habitat and supporting a large, primarily winter, fishery. It is intermediate in water clarity, between Lake Joseph (clearer) and Lake Muskoka (more tea stained). Similarly, its' fish community is intermediate to the others. Whereas Lake Joseph is predominantly a lake trout lake, Lake Rosseau also has significant populations of walleye and pike; though not to the extent that Lake Muskoka does.

The lake is a core lake of the Muskoka Lakes Fisheries Assessment Unit and a large body of inventory and assessment data exists. Efforts have been focused largely on assessment of the lake trout population. A review and analysis of the last 10 years of data is currently being done.

### 2016 Broad-scale Monitoring

Lake Rosseau was sampled in 2016 as a “trend” lake for Cycle 2 of the provincial Broad-scale Monitoring program. Results will be reported through that program. Two species not previously documented in the lake were captured; Emerald Shiner and Logperch. Both species are thought to be native to the lake.
